

## Nov 05 The team tested the kayaks

*Race*

Viktoria arrived late last night with all the gear, not so common around the teams that have arrived so far, probably the only one.

The day started with kayakpaddling along the coast. It was a rather smooth ride when the waves were quite moderate.

The team also had time for chatting with FJS, Kinetic, Multisport.fi, Cyaonosis, Nuun and the organisers.

The boxes from Special Delivery arrived so now all the equipment is in place. But that didn't mean that theres nothing els they need and a second wave of shopping was organized.

On friday the teams will register and then there's only one day more to go before start.

Entering the beach when trying the kayaks and the waves.
